

I'm very proud and honored to welcome xm satellite radio into my home. I live in an area where radio broadcasting isn't good at all. I also love hearing traffic and weather from other areas, of this nation. To you commissioner powell, sir, i know you and the other commissioners will agree with xm satellite's position, on this matter and tell the nab, nice try but no, xm satellite radio is right and the nab is downright wrong. I personally want to say, thank you for hearing a fellow and hard working american out, on this issue of extreme importance. Again, i want to say thank you, for letting me write to you, in this important matter.
